## About Us

Ganga Metco is a leading manufacturer, exporter, and supplier of a wide range of superior quality products. We are engaged in the manufacturing of several products for a long time and as an experienced company, We know how to serve our customers.

Our highly proficient and talented professionals employ advanced machines and techniques to produce a superior range of industrial products. Our range of products scores high on performance, reliability, functional life, efficiency and construction.

---

## Company Profile

Ganga Metco with the mission "Quality first, Innovative products, Valuable Service", is committed to bringing exemplary finish, sturdiness and robust designs with our products hence our products are high in demand for years. We have a team of highly skilled and experienced professionals using the latest technology, procedures, and high-quality raw materials, strict quality management system, in order to deliver the high-quality products and services, always to our customers.

---

## OUR PRETIGIOUS CLIENTS

**AQUAMALL**  
YOUR DESTINATION FOR WATER SOLUTIONS

**STANDARD**  
ELECTRICALS

**C&S**  
electric

**HAVELLS**

**EUREKA  
FORBES**

**FUJIYAMA**

**Genus**  
*Energizing Lives*

**Godrej**

**EXIDE**

**पतंजलि**

**Why Choose Us?**

The In-Depth knowledge of processes and complete understanding of our every action before performing them assist our quest for excellence

---

## **Production**

We have a production facility with the latest technological machines (3 Automatic CNC Punching Machines, 5 Automatic CNC Bending Machines, 40 Power Press Machines range 5 tons to 100 tons ) 5 types of welding facility.

1.Mig-Welding. 2.Tig-Welding. 3.Spot-Welding. 4.Arc-Welding.  
5.Stud-Welding.

Also we have Converized Powder Coating 11 tanks chemical treatment Process. \_\_\_\_\_

## **Excellence**

Ganga Metco has advanced and Components, parts developed tools that make it faster and easier to design enclosures, cabinets, sheet metal, components, parts Sheet Metal Fabrication, Metal Cabinet Of Inverter, UPS, Water Purifier, Sheet Metal Distribution Boxes, etc.

---

## Advanced Design Tool

---

## Customer Support

---

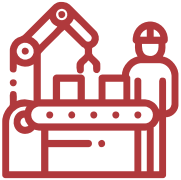

We are committed to offering our customers the best in class products. And swiftly provide the best services and respect our customer's view towards Ganga Metco and its products.

---

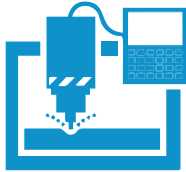

01

We have the capacity to Produce 500 tons sheet metal products per month.

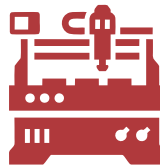

02

We have 3 CNC punching machines and can process upto 1500 X 5000 mm.

03

We Have 5 bending machines.

04

We Have 40 power press machines.

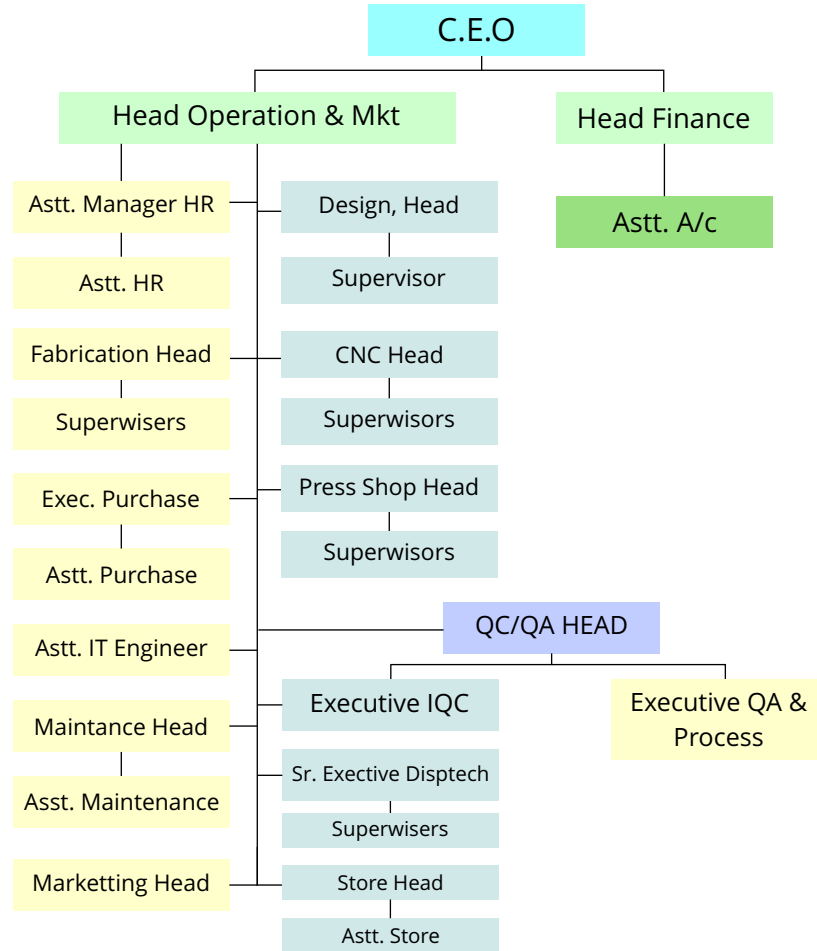

05

We have 3 converized powder

# Company Structure

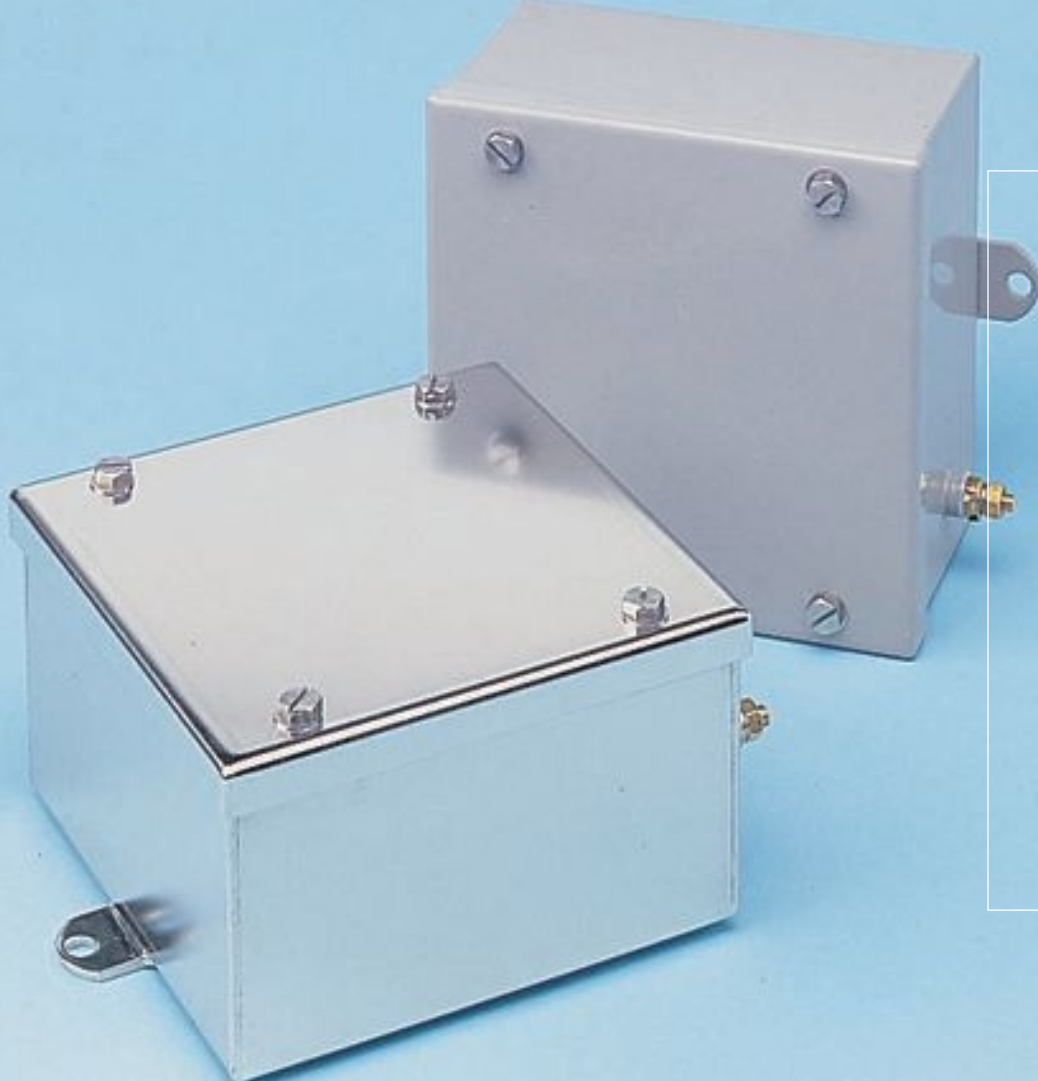

# Our Products

# Enclosure & Distribution Boxes

---

Enclosures are made from sheet metal, stainless steel, or aluminum. Sheet Metal is used for making enclosure boxes because of their high durability and corrosion resistance. These boxes are bacterial and fungal resistant due to their non-porous quality.

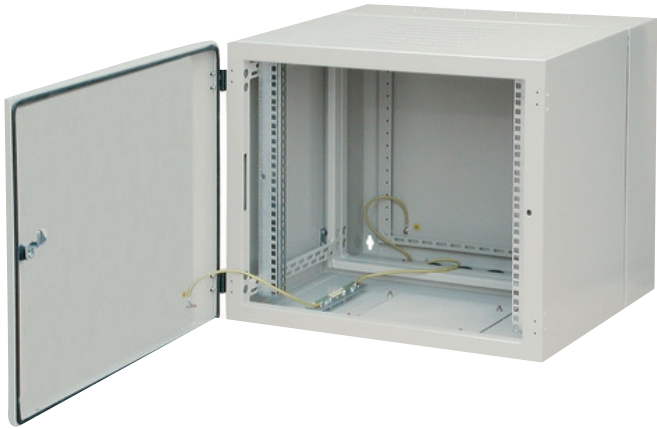

# Enclosure & Distribution Boxes

# Cabinets

---

Metal cabinets are made using sheet metal, which involves a fabrication process. The fabrication processes producing sheet metal include stretching, bending, drawing, cutting and punching.

---

**Cabinets**

**Cabinets**

# Racks

---

Rack is a flat horizontal plane which can be used in a business, home, office etc. It is used to hold items that are being displayed, stored etc. A Rack is also known as a counter, ledge, mantel, or shelf. Features:

- Racks can be customized
- Racks gives a facility of a systematic display
- High strength
- Items can be labelled easily
- Anti-rust and anticorrosion shelves
- Outstanding designs

**Racks**

# Doors

---

The Sheet Metal Door is the most common door found on bases due to its resistance. It is very resistant to damage from tools, melee weapons, and bullets etc.

**Doors**

# Our Services

# **Powder Coating**

Powder coating is a dry finishing process ensuring high quality and durable finish. The powder sticks to the parts due to electrostatic charging of the powder and grounding of the parts. Powder Coating is used as protective & decorative finishes, powder coatings are available in a wide range of colors and textures, and technologies have resulted in an excellent performance.

**Powder Coating**

# Sheet Metal Fabrication Process

---

Sheet metal fabrication is the process of turning flat sheets of steel or aluminum into structures or products, by cutting, punching, folding and assembling. It is the creation of metal structures. It is a complex process but it also involves the use of hydraulic break by which sheet metal fabrication is simplified, as they help create bends at determined angles.

# Enclosure Design Services

---

Designing always starts with a rough description. Enclosures are designed by highly skilled professional designers who help those customers who cannot provide the design of the enclosure. Ganga Metco, as a leading manufacturer of enclosures and cabinets, is enriched with vast industrial practice and offer Sheet Metal enclosure design.

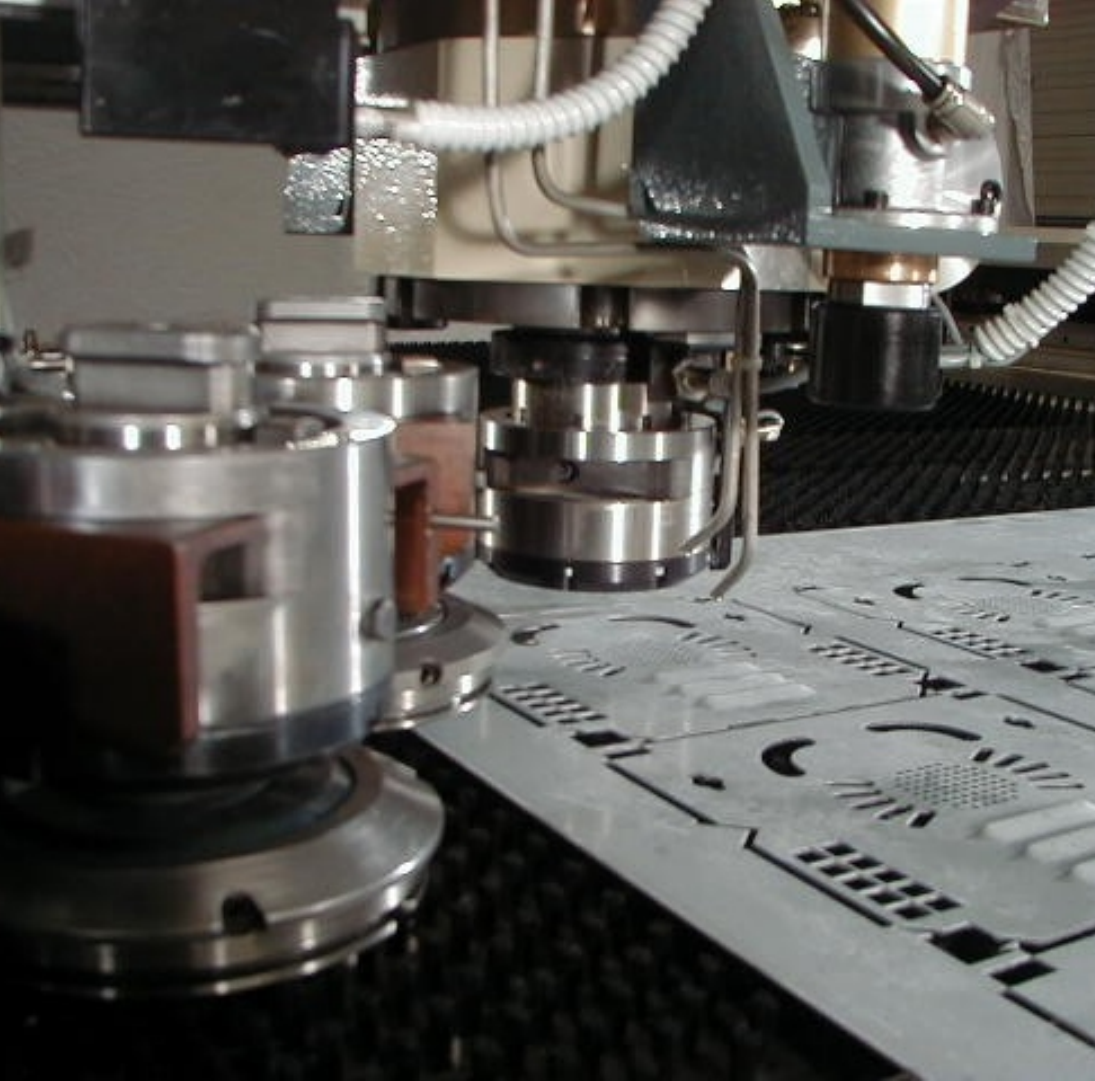

## Enclosure Design Services

# CNC Punching Machine

---

Computer Numerical Control Machine is commonly known as CNC Machine. A CNC Machine is a motorized tool that is controlled by a minicomputer with the help of some input instructions. CNC Machine is used to make highly detailed cuts out of metal pieces for hardware products. CNC is the vast improvement in the industry over the manual machine. At Ganga Metco we have 3 CNC punching machine, with big library of tool upto 1000 no. include the forming tool.

# CNC Punching Machine

# CNC Bending Machine

---

CNC Bending is a manufacturing process and it is carried out by CNC pressbrakes.

These machines can bend single metal pieces and even small batches with the same precision and efficiency and in an economical way. At Ganga Metco we have 5 bending machines

**CNC Bending Machine**

# Power Press Machine

---

A power press is a machine which is used in bulk production mainly from ductile materials such as mild steel. Normally a power press has a rotating flywheel which acts like a storehouse of energy. The various operations of these machines are performed using the components such as the bed, bolster plate etc. At Ganga Metco we have 40 power press machines
